

## TECHNICAL DATA

### GENERAL USES

For use in hard and softwood and composite boards.

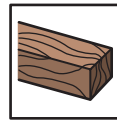

### FEATURES

- High grade HSS steel for extra life.
- Fully ground.
- Up to 3 times the heat resistance of standard carbon steel bits.
- Reduced shank on diameters over 12mm.
- Bright/black finish.

# FLAT WOOD BITS

## TECHNICAL DATA

### GENERAL USES

For drilling large diameter holes in hard and softwood

### FEATURES

- Three point design for faster, cleaner holes.
- Compound angle, ground recessed cutting edge for superior cutting performance.
- 1/4" quick release hexagonal shank for use in both 3 jaw chucks and 1/4" quick release adaptors.
- Bright finish.

## HEXAGONAL SHANK FLAT WOOD BITS

# FLAT BIT EXTENSION SHANK

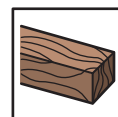

## TECHNICAL DATA

### GENERAL USES

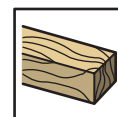

Extension rod in either 150mm or 300mm lengths. For use in conjunction with either 6mm hexagonal shank or 1/4" quick release shank flat wood bits.
